COMPANY BROCHURE 2026

# Design. Engineer. Deliver.

Engineering and construction
backed by the experience of our people.

**Architecture • Engineering • Project Management • Construction**

Nigeria | Private clients and project partners

# Your brief. Our focus.

Practical design, coordinated execution and responsive communication.

Struvis Engineering Limited is a Nigeria-based engineering and construction company serving developers, property owners and organisations. Our founding team brings direct experience from major projects delivered during their previous professional engagements.

**10+**
years combined team experience

**₦5bn+**
value of projects contributed to

**40+ km**
prior road infrastructure experience

## SERVICES

**01**

### Architectural design
Layouts, drawings and engineering coordination shaped around site conditions and practical use.

**02**

### Construction and renovation
New buildings, refurbishment and improvement works coordinated against agreed specifications.

**03**

### Supervision and management
Site monitoring, progress updates, procurement follow-up and documented project decisions.

**04**

### Roads and civil works
Road construction and associated earthworks, pavement, drainage and culverts where specified.

**05**

### Procurement and supply
Sourcing, specification and quantity checks, dispatch coordination and documented delivery.

**06**

### Interiors and specialist services
Interior and exterior works, with specialist technical services scoped to the competence required.

Deliverables, responsible personnel, exclusions, payment stages and programme are defined for each assignment. Appropriately qualified specialists are engaged where required.

# Spaces that work.

Design and construction experience from prior professional engagements.

## ARCHITECTURAL DESIGN

Our team’s prior architectural experience includes bungalows, duplexes, plazas, schools, automotive repair garages, offices and interior design. This experience informs our approach to functional layouts and practical use.

## BUILDING CONSTRUCTION

Team members have participated in construction and renovation assignments involving duplexes, bungalows and office buildings during previous professional engagements.

That background informs our approach to site coordination, materials and the practical sequence of construction.

# Infrastructure
## built on experience.

**40+ km** of road infrastructure across northern Nigeria

Members of our leadership and technical team have participated in the planning, supervision and delivery of more than 40 km of road infrastructure during previous professional engagements.

# Supply with purpose.

School furniture and empowerment items from previous team assignments.

## SCHOOL DESK MANUFACTURING AND SUPPLY

**7,896 desks** **4 weeks**

Members of our team participated in a school desk project. It recorded fewer than 10 desks requiring repairs after delivery. This experience supports production coordination, workmanship and organised institutional supply.

## EMPOWERMENT ITEMS

One procurement, supply and delivery assignment to different states in Nigeria. Team experience includes refrigerators, laptops, sewing machines and grinding machines, with coordination from sourcing to designated delivery locations.

# Let’s build your next project.

### Quality and reliability

Specifications, workmanship and realistic delivery planning.

### Innovation and sustainability

Practical improvements that support material efficiency, durability and ease of maintenance.

### Integrity and accountability

Honest communication, clear commitments and responsibility for agreed work.

### Client focus

Decisions guided by your priorities and supported by timely communication.

---

**A CLEAR ROUTE TO DELIVERY**

Understand the requirement → Define the engagement →
Coordinate delivery → Inspect and hand over

Share your project location, scope, available drawings, budget range and preferred timeline so we can discuss the technical input and next steps.
